SARA LIN DESIGNER

Sara Lin brings to Unison a thorough understanding of design and practical working experience. During her years at Unison, Ms. Lin has been the lead designer on a number of projects for clients spanning industries and nations. Ms. Lin's work has been singularly recognized by an award from the Association for Retail Environments, and her work as part of the Unison team has received a number of other awards.

Prior to joining the Unison team, her career includes product design positions at Radius Product Development in Boston, as well as KEK Design Associates in Rochester, New York. In these positions, she has worked on many projects for major clients such as Airowireless, Fisher Price, Georgia Pacific, Kodak, and Leapfrog. Her work has also been featured in "Design Dynamics: Integrating Design and Technology."

Ms. Lin received a Bachelor of Fine Arts in Industrial Design (Magna Cum Laude) from the Rochester Institute of Technology, where she minored in Art History. While there, she earned academic scholarships for her work and was co-president of the IDSA student chapter at RIT.

Ms. Lin also contributes her time to volunteer work. She was co-chair of Thought at Work, an industrial design conference that helps design students to explore the idea of creativity with professional designers and artists. The conference was featured in I.D., the leading international design magazine.
